

3P Certification Program

3P Certification Program

The world has changed.

COVID-19 has forced us all to think differently about how we handle sanitation at work and at home. This virus is not going away and will be with us for many years to come. Toxic chemicals which release noxious fumes that are harmful to humans, animals, and the environment have historically been used to combat contagion. This has resulted in 'super' bugs that have grown resilient to their effects, making them less effective or obsolete. The rapid spread of the novel coronavirus has resulted in numerous mutations and strains which make it extremely difficult if not impossible to vaccinate against, similar to the Flu. Fortunately there is a better way. 3P America has the solution.

3P Certification Program

A faded American flag is visible in the background of the slide.

There is a better way.

3P America has developed a comprehensive proactive solution to inferior reactionary sanitation by preventing viruses, mold, bacteria, algae, and other pathogens from infecting an area using **NON-TOXIC & ORGANIC** solutions. Our process is safe, affordable, and most importantly - effective. We are able to neutralize contagions, preventing their spread, and effectively sterilizing them. Even better, our process will sanitize and continue to protect treated areas for up to 90 days between services!

And that's only the beginning...

3P Certification Program

The 3P Certification Process

3P Certification consists of 3 simple steps:

PURGE

PREVENT

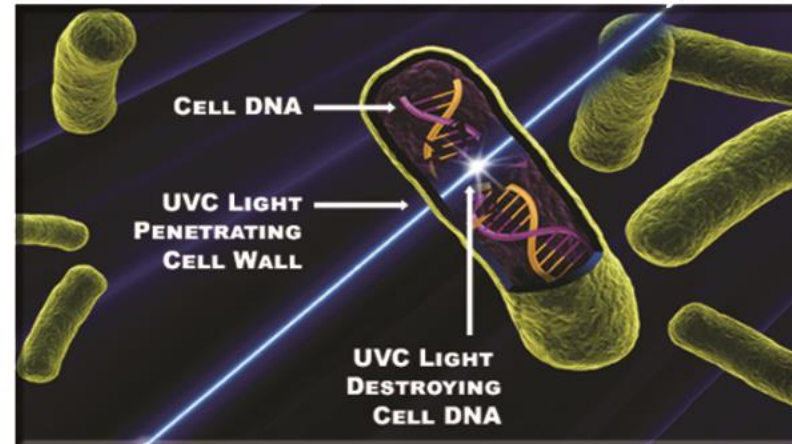

PROTECT

3P Certification Program

3P Purge

The 3P Purge service uses high-intensity UVC beams to systematically irradiate the vicinity, effectively removing all airborne and surface-level pathogens in the area.

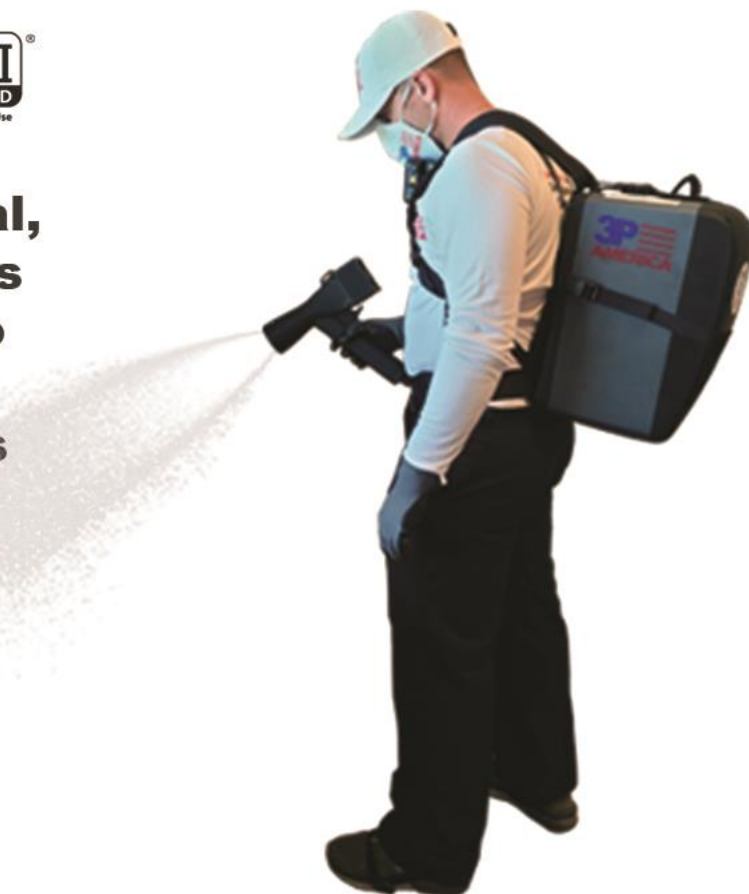

3P Certification Program

3P Prevent

The 3P Prevent service applies a non-toxic, antimicrobial, protective coating to treated surface areas that prevents future contaminants from binding or replicating for up to 90 days. This coating has been shown to prevent replication and eliminate 99.99% of bacteria and viruses that come into contact with treated surfaces. The solution has been deemed a medical 'device' by the FDA and is backed by multiple studies from the CDC.

3P Certification Program

3P Protect

3P Protect adds PPE solutions that enhance your safety during everyday physical activities. The goal of 3P Protect is to eliminate, as best as possible, non-surface contaminants between service intervals. This helps prevent contamination via human contact transmission, airborne contaminants, or even untreated cleaning equipment. Fear not, 3P America has got you covered!

3P Certification Program

We'll get the word out for you!

Advertising and promotion is included in the program.

- **3P Certified Clients receive promotion and advertising from us to let everyone know what you're doing to keep them safe!**
- **We promote for you on social media, billboards, tv, and radio.**

3P Certification Program

Compliance & Reporting

Your home is your temple. We take that seriously. That's why every service is fully recorded and accounted for using tamper-proof police-grade body cameras that are attached to each service professional who enters your residence. These recordings are kept confidential and used only for accountability and regulatory purposes. We can also provide full disinfecting agent and usage reports for every service to meet regulatory guidelines. Lastly, our services are fully licensed, bonded, and insured.

We've spared no expense, ensuring our clients safety and security, to provide the best service possible.

3P Certification Program

Client **Portal** Access

All clients receive free unlimited access to our online Client Portal. The portal provides secure access to invoices, document and certificate downloads, payment system, encrypted messaging, service records, and service calendar where clients can book or update their

Features:
